

SPAN

Geo-Mattress® UltraMax™ for Stretchers

A key to exceptional
continuity of care –
on every patient
surface.

Shear Transfer Zones® cover design and Geo-Matt® segmented surface deliver unsurpassed protection against shearing, pressure, and heat/moisture buildup.

Precision engineered to help patients achieve a level of restful comfort typically possible only on full-sized hospital bed surfaces.

Exclusive UHP 500™ core in seat section and 3-Dimensional Zoning™ design provide support and durability not achievable with traditional HR, latex, or viscoelastic foams.

SPAN
Geo-Mattress®
UltraMax™
for Stretchers

Packed with the design innovations that have made Span a recognized pioneer in premium pressure redistribution support surfaces.

High Performance Foam

UHP 500™ Ultra High-Performance foam in high-fatigue seat section; 55% higher support factor yields superior resiliency and recovery.

Non-shearing surface

Geo-Matt® non-shearing surface creates individually articulating cells; Ring-of-Air® channels dissipate heat and moisture.

Anatomically calibrated support

3-Dimensional Zoning™ design provides anatomically calibrated levels of support and immersion throughout.

Heel Protection

Extra-soft heel section facilitates immersion to provide added heel protection.

Shear Transfer Zones® cover design

Silicone-coated, shear-minimizing fabric bands located on the cover's underside help prevent heels, sacrum, and scapula from "digging into" surface. Protect against macro-shear, micro-shear, and rotational (pivot-induced) shear.

Dual anchoring

Durable, non-slip bottom is outfitted with wide strips of "hook" attachment fabric for secure attachment to a variety of common stretcher models.

SUPPORTS

Up to 700 lbs.

MATTRESS WEIGHT

Approximately 20 lbs.

ALL COMPONENTS

100% latex-free and 100% PBDE-free

FLAMMABILITY

Conforms to NFPA 101 (Life Safety Code™); Cal. TB 117; ASTM E1590; and 16 CFR Parts 1632 and 1633.

SPECIFICATIONS

(All models listed are 5" high to facilitate maximum immersion)
