The Art of Choosing

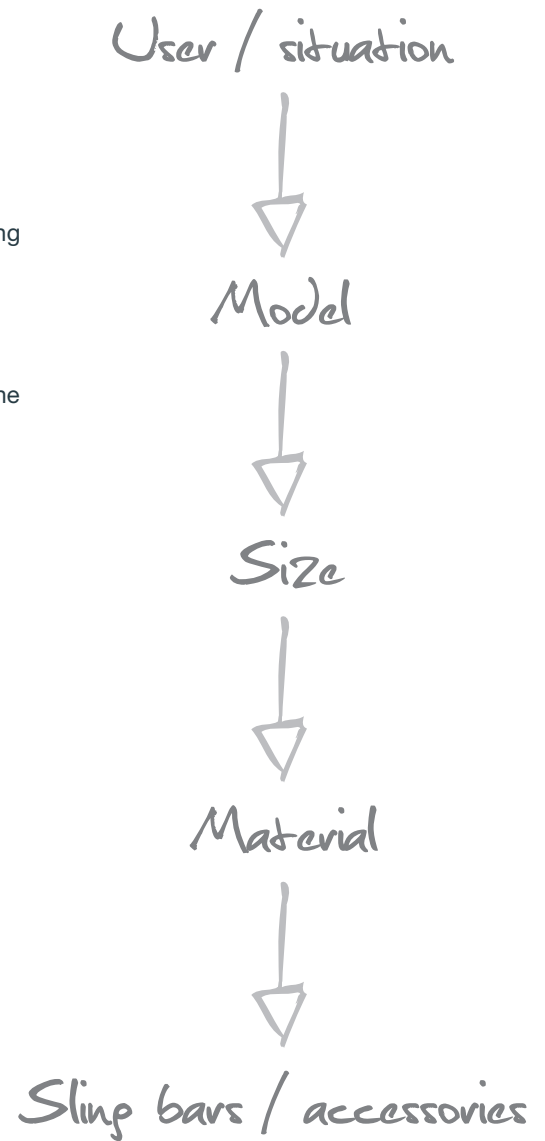

With over one million slings manufactured worldwide, Handicare offers a comprehensive line of styles, sizes, and materials that can be used with most ceiling or floor lifts. We also offer options for users that require a customized solution.

Several factors go into choosing the right sling, but it all begins with the user, their ability and need for support, and also the type of transfer being performed. After the initial assessment is made, the sling model is selected first, then the size, and the material. Finally the sling bar and any accessories that may be needed for optimal lifting are chosen.

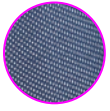

The aim is to maximize safety and comfort for the user by choosing the right sling model for each situation.

Handicare offers solutions for many different transfer situations and for all users. Each of our slings are designed and produced for safety and comfort, both for the user and the caregiver.

Some models and materials work best for seated transfers, for example, between bed and chair, while others are adapted for situations such as lifting from the recumbent position, for hygiene, bathing, or showering.

Materials

Mesh with Anti-Microbial Coating

- Highly durable, open-weave polyester blend
- Manufactured for strength
- Mesh slings have quick drying properties and are highly breathable
- Slings made of this fabric are washable

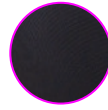

Polyester (Poly) with Anti-Microbial Coating

- Highly durable, closed weave fabric manufactured for strength
- Slings made of this fabric are washable and have an anti-microbial coating
- Some of our Polyester slings offer open-cell foam padding in the leg supports and optional head supports.

Polyester SlipFit (PolySlip)

- Smooth knitted polyester fabric that can stretch providing ease of application and added comfort
- Includes outer leg sections of 'slip fit' nylon material with low friction properties allowing it to be fitted / removed more easily

Spacer

- Multi-directional stretch
- Wicks away moisture
- May be suitable for those with skin integrity issues
- May provide a more comfortable fit for those in pain

Polyester Mesh (Mesh / Poly) with Anti-Microbial Coating

- Polyester mesh is combined with smooth polyester layer and non-absorbent padding on inner leg sections
- Ideal for use in swimming pools and for showering while the sling is in position

Quilted Mesh (Quilted)

- Our Quilted Mesh fabric slings have a unique blend of quilted open cell foam and polyester that provides increased comfort for users and reduces bunching under the legs
- Highly durable and constructed to be permeable, allowing for air and water to pass through
- Easily washable when needed
- Seated style transfers slings have the body of Mesh material and the leg supports of Quilted Mesh material

Disposable

- Designed for single patient use, this non-woven, stitch-bond polyester is strong, highly breathable, and liquid repellent
- Can be spot cleaned of light soiling; disposable fabric slings are designed to be left in place
- Premium version includes padded leg and head support, increased SWL, and ability to position user in sling

Padded with Anti-Microbial Coating

- Padded polyester leg bands with increased comfort

Sizing Guide

Remember to use your best clinical judgment when choosing a sling size which best fits your patient / user. People come in all different shapes and sizes and two people may weigh the same or be the same height but require different sized slings. If the patient / user weighs over 400 lb (181 kg) a sling consultation is recommended.

All Seated Slings

Child	less than 3 feet less than 91 cm	less than 70 lb less than 32 kg
Junior	3 - 4 feet 91 - 121 cm	70 - 110 lb 32 - 50 kg
S	4 - 5'6 feet 121 - 152 cm	95 - 150 lb 43 - 68 kg
M	5 - 6 feet 152 - 183 cm	125 - 250 lb 57 - 113 kg
L	6 - 7 feet 183 - 213 cm	250 - 400 lb 113 - 181 kg
XL	6 - 7 feet 183 - 213 cm	400 - 480 lb 181 - 218 kg
XXL	more than 6.5 feet more than 198 cm	480 - 1,000 lb 218 - 454 kg

Spacer fabric slings sizing is located on the tag.

Rehab Total Support System
